

CAST IRON COOKWARE

- Excellent heat conductivity providing an even consistent temperature throughout the entire pot, which is perfect for slow cooking soups, stews and chili.
- Enamel coating provides a non-stick surface that makes cooking easy without food sticking
- Superior heat retention is helpful in keeping the food warm, great for oven-to-table serving
- Cast iron pieces are extremely durable
- Suitable for all heat sources and any type of stove top inclusion hob

CAST ALUMINIUM COOKWARE

Ceramic Non-stick Coating provides excellent nonstick cooking without the toxins or dangerous chemicals, free of PFOA and PTFE. Ceramic is smooth and requires only a little oil or butter to keep food from sticking. It is safe to health and environment. Also, it is extremely hard and scratch-resistant and easy to clean.

The collection made of Die-Cast Aluminium with excellent thermal conductivity and retention as well as its light weight. The pans feature ergonomic stay-cool bakelite handle and the casseroles with vented glass lid lets you easily keep an eye on your cooking food.

Suitable for all stove tops including induction.

Steamer, Separator, Divider as Bonus

Ensures complete safety

Gasket Offset Device: Ensures that the Pressure cooker does not build pressure unless it is properly closed.

Pressure Regulator: The unique pressure membrane regulator automatically releases excess pressure while cooking.

The Safety Plug: In case the pressure regulator ceases to work, this two-in-one safety device releases the excess pressure.

Visual Pressure Indicator: The safety plug comes up indicating pressure inside the cooker.

The Anti-clogging Mesh: Ensures that food does not clog up the pressure regulator, allowing it to function with zero problems.
